## Profile

Data Analyst fresher with hands-on experience in data cleaning, exploratory data analysis (EDA), dashboard design, and KPI tracking through internships and personal projects. Proficient in Power BI (DAX, Power Query), SQL, and Python for transforming raw data into business insights. Seeking an entry-level Data Analyst role to drive data-driven decision making in a fast-paced organization.

| • MongoDB         | • Matplotlib   | • Seaborn       |                 |

## Professional Experience

**Data Analyst Intern** 12/2025 – 04/2026  
JHS & Associates LLP Ahmedabad

- Processed and transformed 6+ datasets using SQL, Excel, and Power Query, improving data accuracy and reducing manual preparation effort by 30%.
- Developed 3+ interactive Power BI dashboards with DAX-based KPIs and drill-through analysis to support business reporting and decision-making.
- Applied data visualization best practices to enhance dashboard usability, improve insight accessibility, and streamline stakeholder reporting.
- Automated data preparation and reporting workflows using Power Query, ensuring consistent data refreshes and reducing manual reporting effort.

**Data Analyst Intern** 02/2025 – 07/2025  
Grras IT Solutions Ahmedabad

- Cleaned and analyzed 5+ datasets using Python and SQL, improving data quality and supporting accurate business reporting.
- Developed 4+ dashboards and KPI reports in Power BI to monitor performance metrics, operational trends, and business outcomes.
- Created optimized SQL queries and data validation scripts to identify data quality issues and enhance reporting accuracy.
- Performed statistical analysis and customer segmentation to generate actionable insights and reduce reporting turnaround time by 25%.

## Projects

### Loan Delinquency Risk Analysis

- Analyzed customer financial and repayment data to identify delinquency trends, borrower risk profiles, and key factors influencing credit risk.
- Performed data cleaning and exploratory data analysis (EDA) to uncover patterns in customer behavior, repayment performance, and portfolio health.
- Designed an interactive Power BI dashboard featuring KPIs, customer segmentation, repayment trends, and risk analysis, providing stakeholders with real-time visibility into loan portfolio performance.
- Delivered actionable insights into customer repayment behavior and delinquency trends, enabling stakeholders to identify high-risk borrowers and support data-driven credit risk assessment.

### E-commerce Data Analysis

- Analyzed 105K e-commerce orders across 6,987 SKUs using Python and Pandas, building an interactive Streamlit dashboard with Plotly to visualize revenue (₹709.9L), category performance, and geographic trends.
- Applied KMeans clustering to segment SKUs into Star, Regular, High Risk, and Low Stock categories (1,747 Star, 970 High Risk SKUs) to support inventory prioritization decisions.
- Built a Random Forest classification model and an XGBoost regression model to predict order cancellation risk and forecast sales.

- Developed a live ML prediction tool for real-time cancellation risk and SKU segment classification, and integrated a Power BI dashboard for business reporting.
- Customer Churn & Retention Analysis**
- Performed end-to-end churn and retention analysis by writing MySQL queries.
  - Building MongoDB aggregation pipelines (session analytics, feature retention, onboarding funnels, engagement scoring).
  - Using Python for data merging, cleaning, hypothesis testing, and customer segmentation.
  - Designed a Power BI dashboard analyzing 1,204 customers with 22.09% churn rate, featuring interactive filters and actionable retention recommendations for stakeholders.
