Profile

Data Analyst fresher with hands-on experience in data cleaning, exploratory data analysis (EDA), dashboard design, and KPI tracking through internships and personal projects. Proficient in Power BI (DAX, Power Query), SQL, and Python for transforming raw data into business insights. Seeking an entry-level Data Analyst role to drive data-driven decision-making in a fast-paced organization.

Skills

- | | | | |

Professional Experience

Data Analyst Intern 12/2025 – 04/2026
JHS & Associates LLP Ahmedabad

- Processed and transformed 6+ datasets using SQL, Excel, and Power Query, improving data accuracy and reducing manual preparation effort by 30%.
- Developed 3+ interactive Power BI dashboards with DAX-based KPIs and drill-through analysis to support business reporting and decision-making.
- Applied data visualization best practices to enhance dashboard usability, improve insight accessibility, and streamline stakeholder reporting.
- Automated data preparation and reporting workflows using Power Query, ensuring consistent data refreshes and reducing manual reporting effort.

Data Analyst Intern 02/2025 – 07/2025
Grras IT Solutions Ahmedabad

- Cleaned and analyzed 5+ datasets using Python and SQL, improving data quality and supporting accurate business reporting.
- Developed 4+ dashboards and KPI reports in Power BI to monitor performance metrics, operational trends, and business outcomes.
- Created optimized SQL queries and data validation scripts to identify data quality issues and enhance reporting accuracy.
- Performed statistical analysis and customer segmentation to generate actionable insights and reduce reporting turnaround time by 25%.

Projects

E-commerce Data Analysis

- Analyzed 105,952 e-commerce orders across 6,987 SKUs using Python and Pandas, building an interactive Streamlit dashboard with Plotly to visualize revenue (₹709.9L), category performance, and geographic trends.
- Applied KMeans clustering to segment SKUs into Star, Regular, High Risk, and Low Stock categories (1,747 Star, 970 High Risk SKUs) to support inventory prioritization decisions.
- Built a Random Forest classification model and an XGBoost regression model to predict order cancellation risk and forecast sales.
- Developed a live ML prediction tool for real-time cancellation risk and SKU segment classification, and integrated a Power BI dashboard for business reporting.

Customer Churn & Retention Analysis

- Performed end-to-end churn and retention analysis by writing MySQL queries.
- building MongoDB aggregation pipelines (session analytics, feature retention, onboarding funnels, engagement scoring).
- Using Python for data merging, cleaning, hypothesis testing, and customer segmentation.
- Designed a Power BI dashboard analyzing 1,204 customers with 22.09% churn rate, featuring interactive filters and actionable retention recommendations for stakeholders.

Customer Shopping Behavior Dashboard | Power BI

- Designed and developed an interactive Power BI dashboard analyzing 3,900+ customer records across multiple product categories to track revenue, customer behavior, and sales performance.
- Utilized DAX measures, KPIs, and drill-down visualizations to identify high-value customer segments and uncover purchasing trends.
- Analyzed revenue by location, age group, product category, and discount utilization, enabling data-driven marketing and sales recommendations.
- Created dynamic dashboards with filters, slicers, and interactive visualizations to improve reporting efficiency and support business decision-making.

Credit Delinquency Prediction & Risk Analysis

- Analyzed financial data for 500 customers and built a Power BI dashboard tracking credit usage, missed payments, loan amounts, and delinquency rates by age group, location, and card type
- Created interactive visuals showing delinquency trends by age group, debt-to-income ratio, and credit usage over account tenure
- Built a Random Forest classification model in Python to predict customer delinquency risk based on income, credit score, credit utilization, and payment history
- Identified class imbalance in the dataset as a key limitation affecting model performance, suggesting techniques like SMOTE for future improvement

Education		
Bachelor of Engineering in Computer Engineering		09/2022 – 06/2026
<i>SAL Engineering & Technical Institute</i>		Ahmedabad, India
CGPA : 8.10		
Higher Secondary Certificate (HSC)		06/2021 – 03/2022
<i>Nishan School</i>		Ahmedabad, India
Secondary School Certificate (SSC)		06/2019 – 03/2020
<i>Nishan School</i>		Ahmedabad, India

Certificates	
Python + Artificial Intelligence Course	
Centre for Development of Advanced Computing (C-DAC)	
Data Analyst Certificate	
Tata GenAI Powered Data Analytics / Tata Forage	

Languages		
• English	• Hindi	• Gujarati
